

The Sanipac® Recycler

SPRING 2007

Put Carts In Their Place

When you place your carts at the curb, keep in mind that Sanipac's truck may pick them up with a large claw-like clamp. That clamp needs room to reach, grab, lift and replace. Keep your carts curbside and 4 feet apart, and we'll be able to maneuver better. If you don't have a curb or parking strip, you can still help. Visit our website, www.sanipac.com, and click on Placement at the Curb under "Residential" or call us at 736-3600 for assistance.

If you don't have a parking strip, this is how to position your carts. Whichever cart placement option you use, please avoid parking cars in front of the containers.

Trade up to a reuseable water bottle, fill it with our area's sweet water and help put an end to the parade of water bottles going to the landfill. If you need to throw away your disposable bottles, please place them in your commingle cart – not the trash.

Sanipac Recycling Basics

SPRING 2007

Please keep and post these instructions

It's easier than ever!

GENERAL RECYCLING INSTRUCTIONS -

Please make sure your carts are out by 7 a.m. on pick-up day. Place them at least 4 feet apart. All recycling must be clean.

GLASS BOTTLES AND JARS - Clean the containers and place in your blue box.

MOTOR OIL - Put oil in a non-glass container with a screw-on lid and clearly label it. Place next to the blue box.

OTHER RECYCLABLES - Go ahead! Throw clean tin; aluminum; plastic tubs, jugs and bottles #1-5 & 7 (sorry, no #6 or unnumbered plastics); plastic grocery bags; and all paper products (including junk mail, newspapers, magazines, cardboard, paper bags, non-foil wrapping paper, cereal boxes, egg cartons) together in your blue recycling roll cart. No Styrofoam-like material, clothing or biomedical waste.

Proper placement of your garbage and recyclables is shown on our website on the "Residential" page. Remove your containers from the sidewalk and curb by midnight on pick-up day so they do not obstruct public areas or interfere with handicap access.

○ = Holiday:
pick-up is one day
later when your day
falls on or following
the holiday.

AREA MAP

Find the zone that includes your address. Its color matches the color of the week Sanipac will pick up your recycling. Your yard debris will be picked up on the week shaded in the other color.

Hints from your Hauler

The drivers on your route notice ways for you to make the recycling and garbage collection process more effective. Here are two tips:

- 1 Bag the dust or cold ash before you dispose of them in the garbage can. This creates less mess! Try to keep foam peanuts out of the landfill but as a last resort, bag them, too.

Remember: Ashes NEVER go in your yard debris cart.

- 2 Take bagged foam peanuts to area mailing/packaging stores. Also, Aurora Glass wants them to cushion their recycled glass products; go to 2345 West Broadway or call 681-3260.

NextStep Recycling accepts block foam (\$5 charge for 2 cubic feet; 2101 West 10th. 686-2366).

Watch for more ideas in coming issues!

Biodiesel Moves Sanipac

Sanipac now uses biodiesel fuel to power its fleet. Biodiesel fuel emits less carbon into our atmosphere, reducing the impact of climate change.

Sanipac's conversion is the first for a garbage and recycling company in our area and third in Oregon. Sanipac's 85 trucks run on B20. The trucks operate 19 hours a day, 7 days a week.

Just like recycling, reducing carbon emissions is a relatively easy way to protect our environment, and we're pleased to do our part.
