
Don't forget
THE BAG!

Sanipac wants to remind the community "Don't Forget the Bag!" When you grocery shop, be sure to take along reusable bags. Pick up yours at the Sanipac office!

1 trillion plastic bags are manufactured each year around the world, with 380 billion plastic bags and wraps being used in the United States alone, requiring 12 million barrels of oil to create. Exploration, extraction, production, and transportation of oil can take a significant toll on the environment.

Never put plastic bags in your recycle cart. They cause jams in processing equipment that are very dangerous and time consuming to remove.

Plastic bags are extremely lightweight and can act like balloons blowing out of garbage trucks and landfill, often leading to litter found in Oregon's rivers and beaches.

RECYCLE!

IT'S THE RIGHT THING TO DO.
